

Vacancy for a student assistant

DNA-LAB WORK

We are looking for a motivated student assistant (f/m/d)

November/December 2026 ongoing until end of February 2027

Tasks: You will help with the work in a laboratory. Together with a technical assistant you will prepare bumblebees for genetical analysis.

The work is carried out according to a protocol which includes cutting, washing, drying and grinding (liquid nitrogen). Everything will be explained and supervised during the work.

Place: laboratory at Von-Siebold-Straße Göttingen

Requirements: being a student of the GAUG. Interest in Lab work is a prerequisite. Experiences in lab work are preferred. The work requires fine motor skills, care and precision under sterile conditions.

Opportunities: You will be working in a cutting-edge interdisciplinary project (KOOPERATIV: www.uni-goettingen.de/kooperativ/project) and gain experiences in DNA laboratory work.

working days and hours can be accommodated

workwear will be provided
